Ransomware Protection as a Service℠

Attacks will happen. Be prepared.

Ransomware attacks are more pervasive than ever, and new variants are created every day. InterVision’s Ransomware Protection as a Service℠ (RPaaS℠) offers the first complete solution to ransomware by combining 24x7x365 security operations and strategic guidance with immutable backups and managed disaster recovery. Backed by industry-leading SLAs and supported by a dedicated team of experts, InterVision’s RPaaS constantly defends against attacks, and in the rare situation where a new variant breaks through, instantly responds to shut the threat down and recover your operations.

Never Pay a Ransom with True End-to-End Protection
As the industry’s most comprehensive managed service for ransomware protection, InterVision’s RPaaS gives you peace of mind that you have everything in place to proactively repel threats and never have to pay a ransom.

Protect Your Business
Through a holistic protection, detection, and recovery solution

Avoid Ransom Costs
With immutable data replication and recovery in a secured cloud landing zone

Simplify Operations
With a single “as-a-service” solution backed by dedicated security and recovery experts

Ransomware Protection Assurance Process
InterVision’s RPaaS delivers end-to-end cyber attack protection by layering hardened endpoint protection and SIEM to prevent attacks with immutable backups and secured cloud recovery to fully restore data and operations in the rare event of a breach. Your solution is fully supported by certified security and disaster recovery experts to monitor and respond 24x7x365.

Why InterVision’s RPaaS?

The Most Comprehensive Approach Available
No other solutions delivers protection, response, and recovery from cyber threats in a single managed service

Backed by Industry-Leading SLAs
Guaranteed response and recovery to meet your unique objectives and to ensure you won’t pay a ransom

A Trusted Leader in Data Recovery
InterVision’s resiliency solutions have been recognized as leaders by industry analysts (Forrester & Gartner) and 5-star client satisfaction scores

The business impact of a ransomware infection can be catastrophic with an average cost of $3.6 million plus loss of productivity, service disruption and reputational damage. Now is the time to connect with an InterVision cybersecurity expert to make sure you have the protection you need.

- **Protection & Detection with SOCaaS (Security Operations as a Service)**
  - InterVision’s expert SOC team monitors threat activity 24x7x365 to stop attacks before they happen. This experienced, dedicated team identifies and contains malicious activity by leveraging endpoint, SIEM, and other leading-edge prevention technologies.

- **Ransomware Recovery as a Service (DRaaS & BaaS)**
  - InterVision’s managed resiliency process ensures rapid recovery from service disruptions, with trained personnel available 24x7x365 to ensure operation rollover to a secured, scalable cloud environment. Our recovery services combine industry best practices such as air gapping, multi-factor authentication (MFA) and immutable backups with a relentless commitment to testing and documentation.

- **vCISO (virtual Chief Information Security Officer) Services**
  - An InterVision vCISO leads your Business Risk Reduction program for RPaaS by helping your team analyze, advise, and develop important governance policies and processes for your business risk mitigation. During a ransomware event declaration, your vCISO will also oversee your response strategy execution.

**Rest Assured with Ironclad SLAs**
In addition to aligning with NIST Cybersecurity Framework, InterVision boosts your confidence by backing its RPaaS solution with a set of service level agreements that guarantee service uptime, incident response, and most-importantly, recovery time.

- **99.99%** Infrastructure Availability
- **99.9%** RPaaS Service SLA
- **99.9%** Minutes not Hours + 24/7/365 Response Team SLA
- **Your Specified RTO** Recovery Time Objective SLA

* In AWS, an Azure recovery site offers 99/9% uptime
