

**DID YOU KNOW?**

## **The ransomware problem IS a business problem.**

Preventing an attack from ever impacting your data and systems is the best outcome. However, a singular focus on prevention can lead to gaps in your ransomware strategy, leaving your company vulnerable.

- ▶ *If your business was breached today, how would your organization respond?*
- ▶ *What would the impact be on your employees?*
- ▶ *What would it be to your clients?*
- ▶ *What would your clients say, and could you afford to recover?*

**Learn how your team can mitigate risks with a comprehensive ransomware strategy that covers BOTH prevention AND recovery.**
