

# DID YOU KNOW?

## A Proactive and Strategic Approach to Managing Your Cloud Costs with InterVision's Managed Cloud Services

### Right-sizing

Organizations should ensure they are only paying for the resources they actually need by regularly monitoring usage and adjusting the number and size of instances as necessary.

### Automation

Automating tasks such as scaling and backups can help organizations save on costs associated with manual processes.

### Cost Management Tools

Utilize cost management tools provided by the cloud provider to track, allocate and optimize cloud spend.

### Optimize Workloads

Optimizing workloads by choosing the right instance type, using reserved instances, and taking advantage of other cost-saving options can help organizations save money on their cloud costs.

### Multi-cloud Strategy

Organizations can also consider using a multi-cloud strategy, which involves using multiple cloud providers to take advantage of different pricing and service options.

### Cloud Governance

Establishing governance policies for the cloud can help organizations control costs by setting guidelines for usage, provisioning, and security.

### Cloud-Native Technology

By using cloud-native technologies, organizations can take advantage of the unique features and capabilities of the cloud to reduce costs and improve efficiency.
