

DID YOU KNOW?

Go on the Offense in the Fight Against Attacks

InterVision's **PTaaS Powered by RedSpy³⁶⁵** is the only continuous penetration testing service and threat-modeling platform that maps emerging threats and calculates real-time financial impacts in a live environment.

- ✓ We combine **over 200 security, risk and compliance tools** and allow them to alert one another of events and share that information to map out entire potential cyberattack paths.
- ✓ We validate security infrastructure and provide detailed and actionable insights that are **not available with any other cybersecurity tool** on the market today.

Prevent breaches before they occur with a threat modeling platform that continuously maps emerging threats and calculates real financial impact in a live environment.

Safeguard your data and your business with **Penetration Testing as a Service (PTaaS)**. It's the future of offensive security.

Learn why your organization should do continuous penetration testing. **Watch our video now.**
