InterVision

The Impact of Ransomware Attacks

Ransomware attacks are becoming increasingly sophisticated, frequent, and costly.

Healthcare

Healthcare faced the highest average data breach cost at **$10.93 million,** with the overall average cost being $4.45 million across industries

Healthcare data breaches cost **over double the average** across all industries

Large data breaches rose by **239%** in the last four years

239%

Financial Services

Financial services businesses had over **449,855 sensitive files exposed** to employees, potentially compromising crucial data integrity

Nearly **three-quarters** of these attacks resulted in **compromised customer details.**

Manufacturing

One-fifth of all cyber extortion campaigns worldwide are **aimed at the manufacturing** industry

Backdoor deployment* was involved in 28% of these campaigns, surpassing other types of cyberattacks

*In cybersecurity, a backdoor is a means of bypassing an organization's existing security systems
