### Back IT Investments with Actionable Intelligence

Comprehensive infrastructure assessments from InterVision help identify hidden risks, as well as new opportunities. From reigning in Shadow IT to maintaining critical compliance standings, managed infrastructure assessments bring a high degree of expert analysis and actionable findings to your digital transformation plan. InterVision provides a wide range of assessment services, including:

#### Network Assessment

**Scope:** A comprehensive analysis of network infrastructure, covering hardware, software, and configurations

**Tools and Techniques:** We use advanced diagnostics and methodologies to gather accurate, real-time data

**Deliverables:** Detailed reports highlighting risks, performance issues, & recommendations for improvement

#### Wireless LAN Assessment

**Focus:** Assessments focus on evaluating wireless networking performance and coverage

**Benefits:** Ensuring optimal signal strength, reducing interference, and enhancing the wireless experience

**Deliverables:** We provide heatmaps, coverage reports, and recommendations for improvement

#### Compute Assessment

**Focus:** Assessing the overall efficiency of server infrastructure

**Benefits:** Identifying underutilized resources and optimizing configurations

**Deliverables:** We provide performance reports, utilization metrics, and a roadmap for optimization

#### Virtualization Assessment

**Focus:** Evaluating virtualized environments for peak efficiency

**Benefits:** Identifying over-provisioned or underutilized VMs and improving resource allocation

**Deliverables:** We provide health check reports, optimization recommendations, and a strategic plan

### Reduce Risk and Deliver Better Technology Outcomes

A comprehensive InterVision network assessment can help shore up IT infrastructure for the threats of today, and safeguard against whatever comes next. Embark on digital transformation in confidence, with a full report from industry experts, a set of best practices, and industry-leading managed services options.
