

# Managed Assessments

Guided Expertise from Edge to Core to Cloud

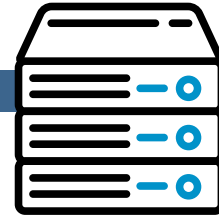

## Edge

Customer devices (IoT, endpoints, etc.)

Systems and end-user resources at the perimeter of an organization's infrastructure

- **Network Assessments**  
Customer devices (IoT, endpoints, etc.)
- ↳ Networking systems at the perimeter of an organization's infrastructure.
- **Collaboration Assessments**  
(calling platform, collaboration suite, conference room A/V)
- ↳ Optimize workspaces for enhanced productivity

## Core

Data center & centralized computing systems

On-premises data storage and processing

- **AI Readiness Assessments**  
Assess readiness for AI implementation.
- ↳ Identify opportunities for scalability and data optimization. and data optimization.
- **Storage Assessments**  
Expert analysis for storage performance and cost optimization

## Cloud

Distributed computing via public or private clouds

Cloud-hosted applications and services

- **Cloud Assessments**  
Analyze cloud usage, identify inefficiencies, and recommend improvements.
- ↳ Align cloud systems with organizational goals.
- **Managed FinOps**  
Optimize cloud spending with detailed cost analysis and budget forecasting.
- ↳ Enable informed financial decision-making through real-time visibility and tailored reporting.

● **Virtualization**  
(VMware vs. Hyperconverged vs. Cloud and VMware optimization)

● **Microsoft 365**  
(Licensing optimization, Security and optimization of Exchange Online, SharePoint Online, OneDrive for Business, and Teams)

● **Compliance**

● **Cyber Risk**

● **Security Posture**

● **Penetration Testing and Vulnerability**

Managing complex IT infrastructures across Edge, Core, and Cloud requires tailored solutions. InterVision delivers these expert assessments and many more to simplify, secure, and optimize IT ecosystems. Discover how InterVision can optimize every stage of your IT Infrastructure.
